

WE ARE THE ARTS

SFA.UCONN.EDU

We balance innovative learning with creative practice. Our teaching philosophy is based on creating fluid connections among disciplines and providing professional opportunities for our students.

We offer a vast array of creative specialties in four departments – Art & Art History, Digital Media & Design, the Dramatic Arts, and Music – that prepare our students for success.

We reach out to our entire student body, and to the larger community, both nationally and internationally. We are committed to reflecting the cultural and racial diversity of our world through our educational philosophy and our creative practice.

We engage entrepreneurially with the arts. As a community of theorists and practitioners, our faculty and students actively produce art in all its varieties, for commerce and for culture.

We map the past, create the present, and visualize the future of the arts.
